Hi Linda

The City was quick to respond. Well log is attached.

Hi Brandon,

Do you have the well log for the City of Redmond monitoring well MW356? If not, no worries. We can get it later.

Subject: Gunshy Sample Locations

Hi Linda

Got your message regarding Gunshy. Here are the locations of the three wells:

- Arthur Johnson Park □ Attached an email from the City of Redmond that includes a map of their monitoring wells in the area. The two southern wells will be included in the PA sampling.
- Residential property – I believe this is also a monitoring well. It is located at (b) (6); Redmond, WA. Attached the corresponding well log.

We'll need to chat a bit about the on-site borings. Reports indicate the fill went in to the Thompson Hay Field. Highlighting that area in the attached Google Earth screenshot. I'm in training today but can give you a call when we have a break.

I've also attached the citizen's complaint about the fill alleged to be contaminated. The attached Oct 10th letter from the property owner also includes information about the fill area.
